### Trader's Challenge:

Traders, who have developed a mechanical strategy, have a requirement to execute the strategy when the market conditions match the strategy even if the Trader is not at the computer.

### Trade Navigator's™ Feature:

Trade Navigator's™ Automatically Trading a Strategy feature allows the Trader to automatically trade a mechanical strategy with the Automatically Trade feature. The Trader must be trading with a brokerage firm that has an interface to Trade Navigator

### Trade Navigator's™ Benefit:

Trade Navigator's™ Automatically Trading a Strategy feature permits the Trader execute a trade without manually sending the trading order(s) to the broker. A summary of additional benefits include:

1. Saves Trader time and therefore money.
2. Assists in the Trader's trading execution process.
3. Simplifies the Trader's work.

### Trade Navigator™ Example:

In this example of the Automated Trading Set Up window, the Trader has a strategy "ADX bias Cross" and it is applied to the XOM symbol for the signals.
