Trader's Challenge:

Traders, with a specially designed trading strategy, have a requirement to know the possible trading orders (rules) for the next bar.

Trade Navigator's™ Feature:

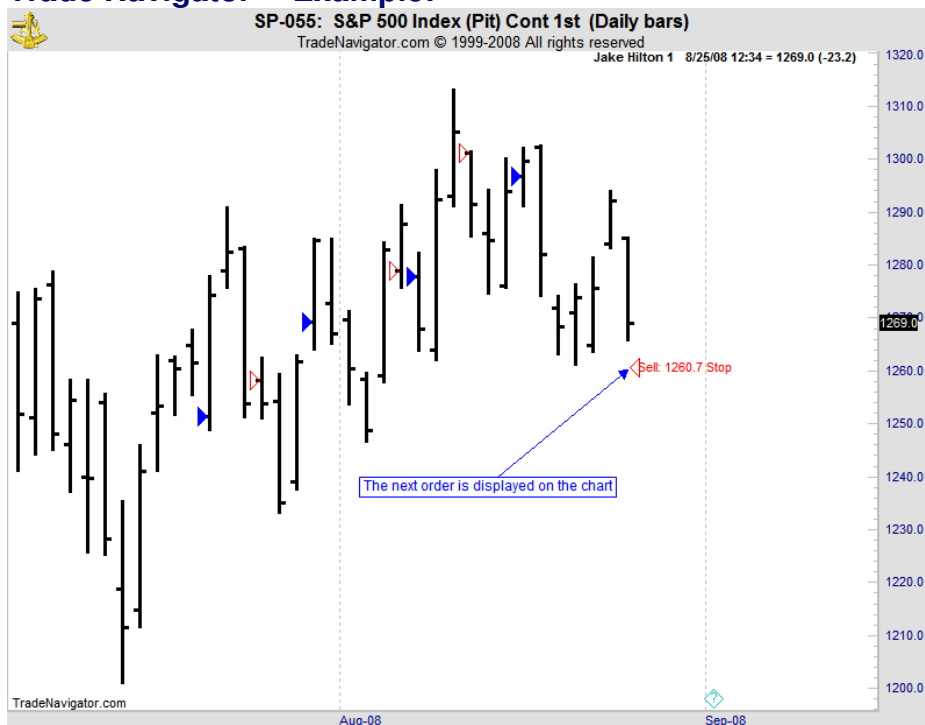

Trade Navigator's Next Bar Strategy Order Reports will display the trading order (rule) on the chart.

Trade Navigator's™ Benefit:

The Trader can keep track of the orders visually on the chart. This provides the Trader the ability to check the charts to know exactly what orders might be executed with the broker. It also allows the Trader the ability to see contingent orders. A summary of additional benefits include:

1. Saves Trader time and therefore money.
2. Assists in the Trader's trading execution process.
3. Simplifies the Trader's work.
