

## “What If” Functionality

### Feature Availability is by Trade Navigator™ Product

Silver	Gold	Platinum
Not Available	Available	Available
Lite	Standard	Professional
Not Available	Not Available	Available

### Trader’s Challenge:

Traders would like to know what various indicators would look like “IF” the market price were to rise or fall.

### Trade Navigator’s™ Feature:

Trade Navigator’s™ “What If” feature allows the Trader to move the current bars closing price up or down and the price based indicators will track.

### Trade Navigator’s™ Benefit:

Trade Navigator’s™ “What If” feature allows the Trader to see how much of a price movement is required to move price based indicators to a specified level. A summary of additional benefits include:

1. Saves Trader time and therefore money.
2. Assists in the Trader’s trading execution process.
3. Simplifies the Trader’s work.

### Trade Navigator™ Example:

Trader can find out how much of a price increase will be required to get the Percent R to rise above 75 and get the moving averages to turn upward. This example shows that the price must get to \$105.04. Using the “What If” tool the Trader can move the price until the indicators move to the level required.
